

RE: retention of FM translator service priorities. As a K-Love listener I receive the benefits of large-scale production quality and content as well as local information relating news, weather and events.

Possible displacement of K-Love programming by an LPFM with other programming could lessen communities' ability to participate locally in efforts that join to create a national effect and international scope.

K-Love programming supports cross-cultural, wholesome, positive values and provides potential life-changing opportunities for counseling. The value of the service provided is clearly displayed by the listener-supported format. Listeners are willing to 'put their money where their mouth is' to continue service.

Please preserve my access. Thank you
